

## Science Action Club: Birds in Your Schoolyard

Through games, projects, and hands-on activities, youth in SAC: Birds investigate nature, document their discoveries, connect with scientists, and design strategies to protect our planet. These citizen science based activities are perfect for out-of-school time programs! All participants will receive:

- In-depth training on SAC kits
- Free Curriculum and \$500 materials kit
- Best practices for teaching STEM in the informal learning environment

Programs who register for the training are also signing to complete the full 10 lesson plans this Spring with at least 15 students enrolled each session. Facilitators from each site will be asked to give feedback after each lesson in an online document. Participating sites will receive the \$500 SAC kit for free from the California Academy of Sciences along with the curriculum and free training. The training is appropriate for programs serving middle school aged youth.

March 17th  
9:00-1:00
