

2 WEEKS READY CAMPAIGN

EMERGENCY PREPAREDNESS COMMUNITY CONVERSATION

So much has happened in the past month and though it may be overwhelming, communities have banded together to support one another. But what were to happen if, amidst the COVID-19 Pandemic, Cascadia were to happen?

This past month has shown how unprepared so many are for a disaster. We now have real world experience because of COVID-19 and many programs need more systems in place.

We hope you will join OregonASK in a community conversation to discuss barriers and resources to increase safety within your community child care centers, family child care and afterschool programs.

This campaign is about creating awareness, connecting local partners and understanding what communities actually need to be prepared for a man-made or natural disaster.

**Join us to share your knowledge and
learn more**
