2 options to choose from:

8:30am-3:15pm

8:30am-5:15pm

Diversity Within Us All

3 hours Set 2

Instructor: Pamela Duvall

CKC: Diversity

Are there times when you feel the fit between you and a child/family isn't working, no matter what you try? Are there times when children talk in ways you don't feel confident in how to respond? Do you feel culturally competent? In this training, you will examine diversity within us all through meaningful activities that you can apply the next day in your own child care setting.

Adapting Activities & Materials for Inclusion of Children with Disabilities

3 hours Set 2

Instructor: Joyce McCoy

CKC: Special Needs

Participants will explore ways to encourage inclusion by adapting the activities that are commonplace in most child care programs. Participants will also have the opportunity to practice creating some adapted materials and take some examples home with them. This is hands-on learning for adults!

Counting Leaves & Wild Hypothesis

8 hours Set 1 (or credit)*

Instructor: Linda Rhine

CKC: Learning Environments (6)

Human Growth & Dev. (2)

This 8-hour workshop helps teachers utilize the outdoor classroom as a vehicle for math, science, and inquiry based activities. Children today lack opportunities to experience nature and teachers often need ways to bring science and math to life. What better way to help them take steps towards stewardship of the natural world as they increase their understanding of the scientific method and how math relates to all areas of life. Use your own problem solving skills in this hands-on workshop and don't be afraid to get a little dirty!

***1 college credit through UCC available for this session with an additional fee of \$25. Please ask for more information about this option when registering.**
